

Microlearning – oral hygiene education of the future with GBT

Join **EMS** for the first ever GBT Microlearning Platform and discover how guided biofilm therapy is changing the game within the dental profession

The inaugural Guided Biofilm Therapy (GBT) Microlearning Platform is an exciting and innovative platform that brings together dental professionals from around the world to learn and share knowledge about the latest advancements in oral biofilm management.

Running from October, this platform is designed to provide attendees with the opportunity to gain new insights and perspectives on the benefits of GBT for patients and clinicians.

The platform features expert speakers from various dental fields, including periodontology, implant dentistry and endodontics, who will share their knowledge and expertise on the importance of biofilm management in dentistry.

Speakers and topics are divided into each of the eight GBT protocol steps for even more straightforward knowledge acquisition. Some of these have already been released and others are forthcoming.

SPEAKERS AND TOPICS

- 1. Assessment and infection control**
Professor Magda Mensi: 'Assessment – get to know your patient'
Dr Diana De Macedo: 'Assessment and periodontal charting'
- 2. Disclose**
Dr Hanan Abdalla: 'Biofilm discloser – making our work life easier'
- 3. Motivate**
Faye Donald: 'Motivation – the success depends on home care'
Simone Villa: 'Motivation with patient photos'
- 4. Airflow Max**
Dr Marcel Donnet: 'Airflow Max – what's next?'
- 5. Perioflow**
Vanessa Borken: 'Perioflow Nozzle – minimally invasive and clinically proven'

- 6. Piezon PS**
Lottie Manahan: 'Piezon PS – no pain'
Faye Donald: 'Piezon – technique'
- 7. Check**
Dr Diana De Macedo: 'Check your work'
- 8. Recall**
Dr Penny Hatzimanolakis: 'Recall – the continuous model of care'.

Additionally, there are topics discussed beyond the all-important eight steps. For instance, Dr Celso Da Costa explores GBT as a practice builder, considering the significant benefits of investing in new technologies and protocols.

NEW INSIGHTS AND KNOWLEDGE

Participants will be able to view sessions that cover a range of topics related to GBT, including the latest research, clinical applications and technological innovations. Each video also has a chat function where participants can ask questions.

Then, on 16 December, five of the speakers will be present on the digital platform to discuss GBT, as well as to answer some of the questions asked in the chats.

Given all this, the GBT Microlearning Platform is an excellent opportunity for dental professionals to gain new insights and knowledge and stay up to date on the latest advancements in biofilm management.

Whether you are a seasoned dental professional or just starting your career, this platform offers a wealth of knowledge and opportunities to enhance your practice and improve patient outcomes.

CONNECT WITH GBT

In the first instance, the videos are hosted on the Swiss Dental Online Academy website. Two new videos will be posted every week as the congress progresses. Participants have to register to be able to watch the videos.

The videos are then also posted on EMS' own channels (Youtube and other social media platforms) for you to watch at your leisure. **D**

About microlearning

As stated by Dahiya and Bernard (2021) in their article exploring microlearning for health professionals' continuing development: 'Microlearning enables HCPs (healthcare providers) to learn through succinct, easy-to-digest, and short-duration educational activities.'

Enabling creativity as well as flexibility, alongside the ability of dental professionals to engage in self-directed and self-determined learning, microlearning is a form of education that is increasingly appropriate and compatible with busy schedules.

Here and now, the GBT Microlearning Platform offers bite-sized learning with detailed insights on the eight-step protocol, presented in short videos of two to seven minutes' duration.

Learn more about GBT from different points of view in an easy and efficient way.
